Another patent granted. Earlier this month, Oramed announced that the European Patent Office (EPO) had granted the company a patent focused on non-alcoholic steatohepatitis (NASH) and non-alcoholic fatty liver disease (NAFLD) entitled "Methods and Compositions for Treating NAFLD, Hepatic Steatosis, and Sequelae Thereof." This patent was previously granted to Oramed in the U.S. and is pending in several other major markets. We remind investors that Oramed recently completed enrollment in a Phase 2 trial, which is assessing the safety and potential efficacy of its oral insulin ORMD-0801 in type 2 diabetes (T2D) patients who are also suffering from NASH. Data from a prior pilot study of ORMD-0801 in this indication showed a reduction in liver fat content. The global market for drugs to treat NASH is slated to reach \$84B by 2029, according to a publication by Research and Markets on the Global Non-Alcoholic Steatohepatitis (NASH) Drugs Market. We reiterate our Buy rating and 12-month price target of \$32 per share.

Multiple additional catalysts in the offing. Oramed's late-stage clinical programs continue to advance apace. ORA-D-013-1, the larger of two concurrent Phase 3 oral insulin trials with ORMD-0801, has enrolled more than 75% of the planned 675 subjects. In addition, over 25% of the planned 450 patients in Oramed's second Phase 3 trial, ORA-D-013-2, have been enrolled. The company expects six-month top-line efficacy results from the ORA-D-013-1 trial to be reported in 2022, while the ORA-D-013-2 trial is slated to complete enrollment well before the end of this year.

Independent director with corporate finance skills appointed. Also, earlier this month Oramed announced the appointment of Yadim Rozov to its Board of Directors as an independent director. Mr. Rozov is an investment professional with over 20 years of experience in capital markets, corporate finance, investment banking, and investment management with substantial experience in corporate strategy and governance. He is the founder and Managing Partner of Terrace Edge Ventures LLC, a financial advisory firm. Previously, Mr. Rozov was a Partner of GoldenTree Asset Management LLC, a leading global credit asset management firm, where he also served as the CEO and President of Syncora Guarantee Inc. and CEO of Financial Guaranty UK Ltd, each of which is a stand-alone specialty insurance firm owned by GoldenTree. He was also a Partner and Managing Director at Moelis & Co., where he headed the Financial Institution Advisory group. While at Moelis, Mr. Rozov helped co-found College Avenue Student Loans LLC and served on its board and co-founded Chamonix Partners Capital Management LLC. Before Moelis, Mr. Rozov was a Managing Director at UBS Group AG (UBS; not rated), where he was the Head of the Americas for the Repositioning Group. Mr. Rozov earned an M.Sc. in data science from Columbia University and a bachelor's degree in physics and materials engineering from Rutgers University.

H.C. Wainwright 1868

Valuation methodology, risks and uncertainties. Factoring in a 12% discount rate, a 75% probability of approval for ORMD-0801, and peak annual sales of \$2.6B (on which we project double-digit percentage royalties), we derive a total risk-adjusted net present value (rNPV) of \$800M for this candidate within the diabetes indication alone. We add to this the value from ORMD-0801 in the NASH indication, to which we ascribe an rNPV of \$50M, as well as our anticipated value for Oramed's pipeline, mainly ORMD-0901 and the Oravax program (total value of \$250M), to derive a total enterprise value of approximately \$1.2B. This yields a price objective of \$32 per share, assuming net cash of \$154M—resulting in a total firm value of \$1.3B—and roughly 40M fully diluted shares outstanding as of end-F2022. Risks include, but are not limited to: (1) delays in pivotal testing of ORMD-0801; (2) adverse results from future clinical trials; (3) negative regulatory actions; and (4) medium to long-term dilution risk.

H.C. WAINWRIGHT & CO, LLC RATING SYSTEM: H.C. Wainwright employs a three tier rating system for evaluating both the potential return and risk associated with owning common equity shares of rated firms. The expected return of any given equity is measured on a RELATIVE basis of other companies in the same sector. The price objective is calculated to estimate the potential movements in price that a given equity could reach provided certain targets are met over a defined time horizon. Price objectives are subject to external factors including industry events and market volatility.

RETURN ASSESSMENT

Market Outperform (Buy): The common stock of the company is expected to outperform a passive index comprised of all the common stock of companies within the same sector.

Market Perform (Neutral): The common stock of the company is expected to mimic the performance of a passive index comprised of all the common stock of companies within the same sector.

Market Underperform (Sell): The common stock of the company is expected to underperform a passive index comprised of all the common stock of companies within the same sector.

Investment Banking Services include, but are not limited to, acting as a manager/co-manager in the underwriting or placement of securities, acting as financial advisor, and/or providing corporate finance or capital markets-related services to a company or one of its affiliates or subsidiaries within the past 12 months.
